Dear Parents,

How do electrical appliances work?

As part of classroom science, the girls will undertake an activity to explore how the electrical appliances we use are not "magic"—the girls can open them up and see how they are designed.

As part of the activity, we need some extra electrical equipment, such as old and/or broken telephones, computer central processing units, CD players, radios, electric typewriters, fax machines, answering machines. We are unable to use computer monitors and televisions.

We would gratefully appreciate it if you could donate some of this equipment. Feel free to drop it off to the classroom. We will not be able to return the equipment.

Thank you in anticipation.

Regards,

David Hodgman
Year 5 Teacher
