The Science Department has been investigating further extension opportunities for the Year 10 cohort. *Learning Journeys* is a New Zealand company that specializes in camps that combine adventure and learning opportunities.

Learning Journeys itineraries can be built with student input, to allow for an agreed balance of learning and fun. The company offers many sight-seeing and adventure activities, such as skiing and black water rafting. The science options cover ecology, biotechnology, chemistry, earth and environmental science, physics and geography. These activities are designed with clear school curriculum links and give the girls insights into subjects offered at a Year 11/12 level.

We would like to offer this opportunity in the Term Two holidays in 2014 and are seeking an expression of interest at this stage. This is not binding, and will allow us to build an itinerary with the interested students and finalise costs. It is envisaged, based on supplied quotes, the experience will be approximately \$2500, which includes flights, accommodation, activities and meals.

If you could please return the interest slip below by Friday 18 October 2013.

Kind regards

Aimee Woodward
Head of Mathematics & Science
Fahan School
