In the final stage of the Year 4 iPad Trial we will now require Year 4 students to have their own Apple ID, which they will use on their iPad to be able to download apps and keep backups. As Year 4 students are under 13 years of age we ask parents to create an Apple ID on behalf of their daughter but using their daughter's personal email address (preferably their school one). Students will need to know the password, as they will be required to access the account at school. We have attached a link and instructions below as well as instructions on enabling restrictions on the iPad such as content ratings and categories on which apps can be downloaded for the App Store. The restrictions can be enabled once we go through some processes with students at school in setting up their iPad.

#### **To create an Apple ID:**

1. Go to **<https://appleid.apple.com/>** in a web browser
2. Click *Create an Apple ID*
3. Fill in the required fields and click *Create Apple ID* at the bottom of the page.
4. Check email to verify account (this can also be done by students at school)

We ask that this be completed as soon as possible. We will then work with students in class to help them backup their iPad data, and setup their iPads with their Apple ID.

If students already have their own personal Apple ID they are welcome to use it with their existing school iPad. We also ask that no credit card details are included in any student Apple ID.

Please contact us if any assistance is required with creating an Apple ID and we can make a time before or after school to assist with this process.

Kind regards,

David Hodgman  
Year 4 Teacher

# iOS: Understanding Restrictions (parental controls)

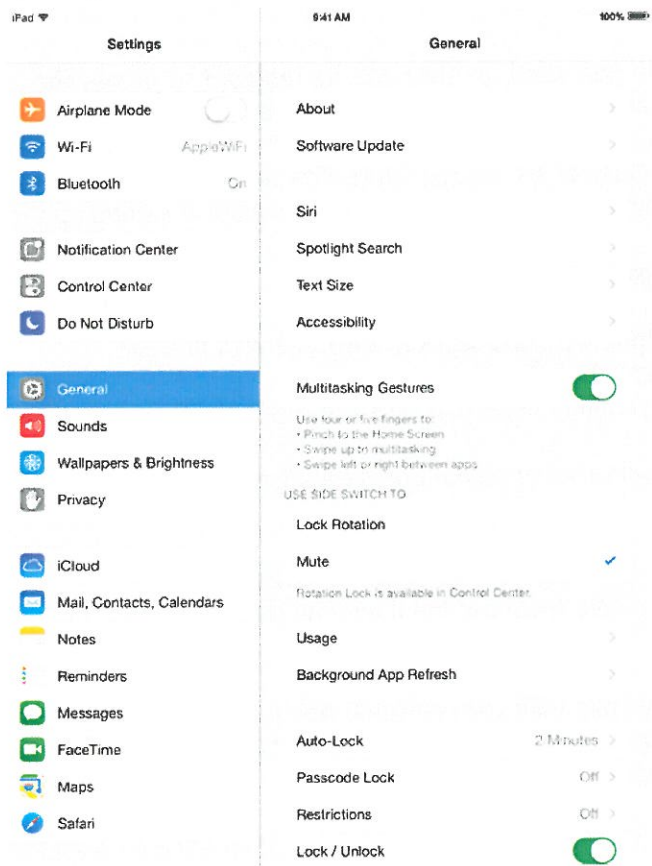

Languages English

You can enable Restrictions, also known as parental controls, on iPhone, iPad, and iPod touch. Restrictions stop you from using specific features and applications. Learn more about the types of Restrictions and how to enable or disable them on your device.

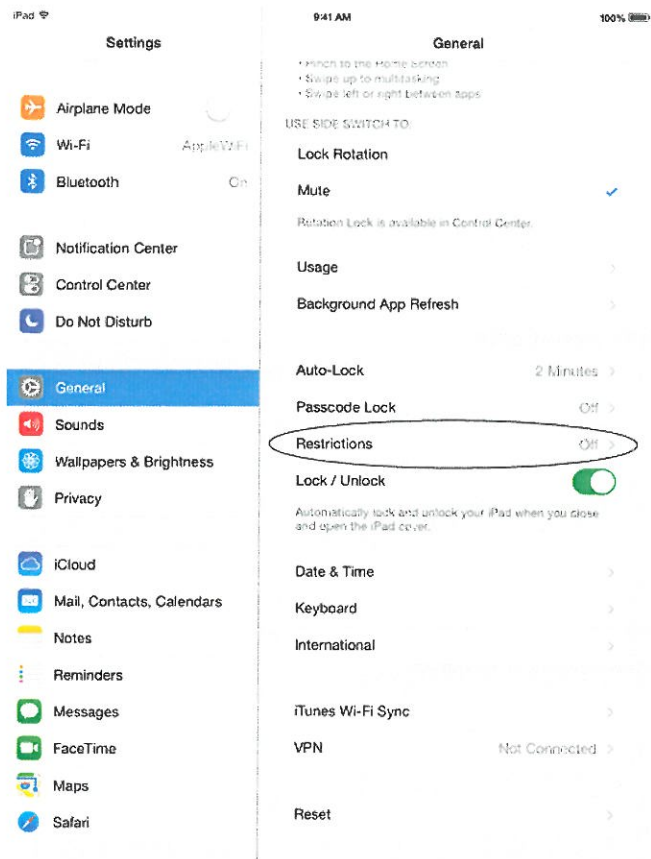

## Using Restrictions

You can enable and adjust Restrictions on your device to prevent access to specific features or content on the device.

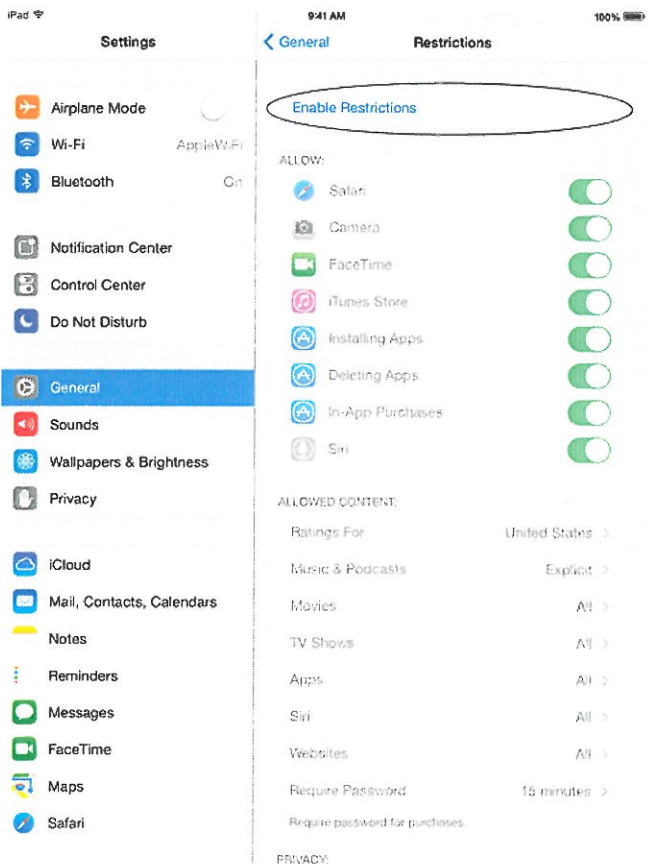

1. Tap **Settings > General**.

2. Tap **Restrictions**.

3. Tap **Enable Restrictions** and enter a passcode. The passcode will be required to make changes to these settings or to disable Restrictions. **Note:** If you lose or forget a restriction passcode, you will need to perform a factory restore to remove it.

**You can restrict access to the following applications and features on the device:**

- Safari
- Camera (also disables FaceTime)
- FaceTime
- iTunes Store
- iBooks Store
- Installing apps
- Deleting apps
- In-App Purchases
- Siri
- AirDrop

**You can prevent access to specific content types:**

- Ratings (select the country in the ratings section to automatically apply the appropriate content ratings for that region)
- Music and podcasts
- Movies
- TV shows
- Books
- Apps
- Siri
- websites
- You can also adjust the time necessary before a password is required to purchase content.

**You can prevent changes to privacy settings, including:**

- Location Services
- Contacts
- Calendars
- Reminders
- Photos
- Bluetooth sharing
- Microphone
- Twitter
- Facebook
- Advertising

**You can prevent changes to the following settings and accounts:**

- Accounts
- Find My Friends
- Cellular data use
- Background app refresh
- Volume limit

**You can restrict features within Game Center:**

- Multiplayer games
- Adding friends

**Note:** You can enable or enforce Restrictions using a profile (typically installed when using the device for business or education purposes). Check for installed profiles in **Settings > General > Profiles**. For additional information, contact the administrator or the person who installed the profile. To learn more about iOS software, see the user manual.

**Additional Information**

If your iOS device is missing a particular application or if a certain feature is not available, ensure that Restrictions are not enabled. Symptoms can include:

- App missing from the Home screen (such as Safari, Camera, or FaceTime)
- Feature or service unavailable (such as Siri or Location Services)
- Setting missing or dimmed (such as Mail, Contacts, and Calendar; iCloud; Twitter; FaceTime)

**Note:** Learn more about using Restrictions (or parental controls) in iTunes.

**Notes**

1. This restricts access to YouTube in iOS 9 and earlier.
2. Learn more about [iBooks and iBooks Store Restrictions](#).
3. You can prevent changes to Mail, Contacts, Calendars, iCloud, Twitter, Facebook, Photos, Books, iTunes, App Store, Messages, and FaceTime.
4. This is available only when you install the Find My Friends app.
